DETAILED ACTION

Claims 1-8 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(i) The combination of claims 1 and 2, and 5 and 6, are vague and indefinite, as they are confusing. Claims 1 and 5 appear to be compound claims, yet claims 2 and 6, which depend on claims 1 and 5 respectively, appear to recite a composition, as it does not appear that Applicant is claiming a complex of the active ingredient and arginine. Are these claims compound claims or are they composition claims?

(ii) The term "derivatives" in claims 1-8 is vague and indefinite, as the metes and bounds of the claim are unascertainable. The specification does not define this term and one of ordinary skill in the art would not be apprised of what chemical modifications/possibilities are encompassed by this term.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1617

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Noel (5,141,964).

Noel exemplifies a composition comprising pyrrolidonecarboxylic acid and arginine. See Col. 3, lines 15-22.

It is respectfully pointed out that the recitation "for the production of nitric oxide in a living body" and "for the production of nitric oxide synthase in a living body" has not been given patentable weight because these recitations occur in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).
